DEDICATION

To **Neely Fuller Jr.** –

Your fearless pursuit of truth paved the way for us to see through the layers of systemic deception. You once said:

“If you do not understand white supremacy — what it is and how it works — everything else that you understand will only confuse you.”

— Neely Fuller Jr.

This truth is especially vital for Black, Indigenous, and other non-white peoples who have long been left in the dark about the very foundations of the systems that oppress us. It is my fervent belief that those who need help the most should receive the most constructive help.

May this work serve as a tool and a beacon—helping to unravel confusion and empowering you with the clarity that Fuller’s words provide.

INTRODUCTION:

The Lie that Took the World

There is a lie so old, so embedded in every system you touch—that it no longer needs to be spoken aloud to be believed.

It is the lie that the world was empty until certain men arrived.

The lie that you—your people, your lands, your languages, your labor—were meant to be used, moved, or removed.

The lie that power, wealth, and divine favor belong only to one class, one race, one empire.

This lie was not a misunderstanding. It was not accidental.

It was declared.
It was written.

And it was sanctified by the church and codified by the law.

That lie is called the **Doctrine of Discovery**.

In 1493, a papal bull (letter), named Inter Caetera was issued by Pope Alexander VI. It stated that any lands not already claimed by a Christian ruler could be seized, subdued, and brought under European rule—and that non-Christian peoples had no rights to sovereignty or ownership.

This was the divine permission slip for genocide, land theft, and cultural erasure.

It birthed white supremacy as we know it: not simply as hatred or bias, but as a global operating system that governs wealth, land, resources, and even the way we view ourselves.

Since that moment, the world has been shaped by a **four-stage process of domination**:

1. **Establishment** – The idea was born: Christian/European equals superior. Indigenous and Black people were devalued from the start.
2. **Maintenance** – This notion was enforced through slavery, segregation, land dispossession, and systematic violence.
3. **Expansion** – The doctrine spread globally through colonization, capitalism, and perpetual conflict.
4. **Refinement** – In our modern era, these legacies are even more insidious—operating subtly through credit systems, zoning laws, property values, and cultural narratives.

If you are Black, Indigenous, or a person of color, you were likely born into this system with no explanation, only expectation — to work twice as hard, to prove your worth, to struggle for scraps, and to feel shame for what was stolen from you.

This book exists to break that silence.

It exists to reveal the architecture of a lie, so you can finally begin to dismantle it — in your thoughts, your choices, your family, your land, and your future.

Because your legacy was never truly lost — it was hidden, renamed, and resold. But it is still yours.

This is not just history. It is now.

And you are the balance the world was always meant to have.

CHAPTER 1

What You Were Never Meant to Know

*Some things were stolen in silence.
Others were stolen in scripture, in maps, in laws.
But the most dangerous theft of all... was the theft of your
understanding.*

If you've ever wondered why the world feels tilted against you —why justice is out of reach, why your labor doesn't build legacy, why your language, your land, your lineage feels like it's been erased — you are not alone.

The truth is, none of this was supposed to make sense to you.

Because you were never meant to understand it. You were only meant to accept it.

From the moment European empires set sail, their mission wasn't just to steal land — it was to steal memory.

To replace your stories with theirs. To define you by the absence of them. To make sure that even centuries later, you would still be confused about what really happened.

But let me be clear:

You were not conquered because you were inferior.

You were conquered because someone wrote a system that said they were superior.

This chapter is about that system. It's about the lie behind the systems we live in today — and the deep confusion that lie still causes in our people.

The Confusion Was the Point

White supremacy doesn't survive because it's logical.

It survives because it's coded into everything.

It was engineered to confuse you on four levels:

- Thought – What you believe is possible for yourself
- Speech – How you define truth, value, and reality
- Action – How you survive inside a system not built for you
- Spirit – Whether you feel worthy of liberation at all

If you don't know who took your land, your history, your voice — you'll spend your life blaming yourself for the loss.

This confusion is especially brutal for non-white people, particularly Black and Indigenous communities, because the trauma is both inherited and ongoing. It shows up in the way we're policed, the way we're taught, the way we're denied loans, jobs, peace, and future.

But confusion ends where clarity begins.

And that clarity starts with understanding the root.

What They Never Taught You in School

In 1493, a European pope drew an invisible line through the world and told Christian kings they could take whatever land existed west of it — as long as it wasn't already claimed by other European Christians.

That order was called the Inter Caetera. It was one of several Papal Bulls — official church decrees — that laid the groundwork for the Doctrine of Discovery.

This doctrine declared that any land not ruled by Christians was “discovered” the moment a European arrived. And any people already living there? They were considered non-human in the eyes of the law.

This is the root of white supremacy — not a feeling, not a slur, not a hooded robe — but a global legal theology built to justify conquest, colonization, slavery, and generational theft.

You didn't learn this in school because confusion protects power.

You didn't see it in textbooks because truth threatens empire.

How This Still Affects You Today

Here’s how the Doctrine of Discovery still shows up in your daily life:

Legacy	How It Shows Up Today
Land Theft	Tribal land loss, redlining, gentrification, heirs property theft
Spiritual Erasure	Christian supremacy, demonization of Indigenous/African traditions
Economic Dispossession	Credit scores, generational debt, wage theft, devaluation of Black property
Cultural Suppression	Language loss, boarding schools, stolen artifacts, educational whitewashing
Legal Disregard	Police violence, environmental racism, broken treaties, "stand your ground"

You were never meant to understand that these systems were designed this way.

But now that you do, you are no longer confused — you are being restored.

Reflection Prompt: Breaking the Spell

1. What's one thing you were taught growing up that now feels like a lie?
2. When did you first realize that the "system" wasn't broken — it was functioning exactly as designed?
3. What parts of your culture or identity have you been told to downplay or forget?

Closing Words for Chapter 1

You are not crazy.

You are not broken.

You are not behind.

You are walking through a world built to keep you confused — and you're choosing clarity instead.

That makes you dangerous in the best possible way.

Now that we've named the lie, in Chapter 2, we'll meet the blueprint:

CHAPTER 2

The Blueprint of Theft — The Doctrine of Discovery

*"If you do not understand white supremacy—what it is
and how it works—everything else that you understand
will only confuse you."
— Neely Fuller Jr.*

Introduction:

The Theft Was Legalized Before It Was Enforced

Before they took the land, they took the pen.

Before they built borders, they built beliefs.

What we now call “property”, “ownership”, and even “civilization” were all shaped through a religious and political agenda—not divine truth.

This agenda was codified under one doctrine:

The Doctrine of Discovery — a global blueprint for theft disguised as salvation.

The Receipts: 3 Papal Bulls That Changed the World

These documents weren't just decrees. They were war strategies cloaked in religious authority — used to justify centuries of colonization, genocide, and cultural erasure.

1. Dum Diversas (1452)

Authorized the king of Portugal to "invade, search out, capture, vanquish, and subdue all Saracens and pagans" — and reduce them to perpetual slavery.

2. Romanus Pontifex (1455)

Granted Portugal exclusive rights to conquest and trade along Africa's coasts, sanctifying the enslavement and economic pillaging of non-Christians.

3. Inter Caetera (1493)

Split the "New World" between Spain and Portugal after Columbus' voyage. It stated that lands not inhabited by Christians were available to be claimed — a global death sentence disguised as a divine right.

The Doctrine's Core Concepts – Simplified

Concept	Meaning
Terra Nullius	"Nobody's land" — if no Christians lived there, it could be claimed.
Dominionism	God gave Christians the right to rule and subdue the earth.
Christian Superiority	Europeans framed themselves as more human than others.

Plain Truth:

If you weren't Christian and European, you were considered nothing.

Not lost. Not different. **Nothing.**

What This Meant Globally

- **Africa** was carved up and commodified
- **The Americas** were renamed and repopulated
- **Asia** was exploited through religion and trade
- **Indigenous** people became "heathens," "savages," "labor," or "obstacles"

This wasn't discovery.

This was domination — a violent redefinition of land, people, and existence itself

SIDEBAR: Johnson v. M'Intosh (1823) – The Doctrine Becomes U.S. Law

"Discovery gave title to the government by whose subjects... the discovery was made."

— Chief Justice John Marshall

What happened?

Two white men claimed ownership of the same piece of land — one through purchase from a Native tribe, the other through a U.S. government land grant.

What the Court decided:

The U.S. government's claim was valid.

Why? Because under the Doctrine of Discovery, **Native people had no legal right to sell or own land** — only the "discovering" government could.

Why it matters:

This 1823 ruling **cemented the Doctrine of Discovery into American law**, legally erasing Native sovereignty and justifying land theft for centuries to come.

 This case is still cited in U.S. courts.

Darker skinned Natives (Indigineous People) were reclassified as Negro, Colored, Mulatto, Black, and eventually "African American"*

REFLECTION BOX

“They did not discover land — they discovered a way to justify stealing it.” — Constructive House

What does being “discovered” actually mean to you?

1. Who gets to “discover” something that was already lived on, built on, and fought for?
2. How would your identity, location, or faith have been defined in 1493?

CHAPTER 3

Legalizing Legacy Theft

"If you do not understand white supremacy—what it is and how it works—everything else that you understand will only confuse you."
— Neely Fuller Jr.

Johnson v. M'Intosh (1823)

This U.S. Supreme Court case is one of the most important legal decisions *you probably never learned about*.

It laid the groundwork for stripping Indigenous people of land while making it look lawful.

Here's the core issue:

Two white men both claimed ownership to the same land. One had bought the land directly from a Native tribe. The other got a land grant from the U.S. government.

The Supreme Court sided with the one who bought from the U.S. government.

Why?

Because Chief Justice John Marshall ruled that **Indigenous tribes didn't have the right to sell their land**. According to the court, they only had a "right of occupancy" — not true ownership — because the land was "discovered" by Europeans.

In other words:

The land belonged to whoever discovered it. And Indigenous people didn't count.

This ruling made it *illegal* for Native peoples to sell, own, or control land — unless the U.S. government allowed it. And because the U.S. based its legal doctrine on European "discovery," the theft was globalized.

Chief Justice John Marshall

Manifest Destiny & The Enclosure of the World

In the 1800s, Manifest Destiny — the belief that the U.S. was destined by God to control the land from coast to coast — gave white settlers a moral excuse to steal.

Add to that the **British Enclosure Acts**, which privatized communal land across England and forced the poor into wage labor, and you have a global formula:

- Declare land “empty” or “misused”
- Criminalize the people already living there
- Legalize their removal
- Profit from their loss

The Global Pattern

The Doctrine of Discovery wasn't just used in America — it became *international law*.

- **Canada** used it to invalidate First Nations land claims.
- **Australia** applied the concept of terra nullius (“nobody’s land”) to justify stealing Aboriginal land.
- **New Zealand** used “Crown title” to overpower the Māori despite the Treaty of Waitangi.
- **Africa, India, the Pacific** — the blueprint repeated: make it law, then take it all.

DOCTRINE OF DISCOVERY

 Europe  Colonized or controlled by Europe  Partial European control or influence

Sidebar: Timeline of Theft by Legal Means

Here's how the Doctrine of Discovery still shows up in your daily life:

Year	Event	Impact
1493	<i>Inter Caetera</i> Papal Bull	Declared non-Christian lands up for grabs
1607	Jamestown founded	Beginning of English land seizures in North America
1765–1815	British Enclosure Acts	Displaced millions in England; modeled for colonies
1823	Johnson v. M'Intosh	Stripped Indigenous land rights in U.S. law
1845	Manifest Destiny named	Justified westward expansion and genocide
1901	Australia's <i>Terra Nullius</i> policy	Denied Aboriginal land ownership
2007	UN Declaration on the Rights of Indigenous Peoples	First global acknowledgment of past injustice — but mostly symbolic

REFLECTION BOX

“They did not discover land — they discovered a way to justify stealing it.” — Constructive House

 **What does it mean to “own” land — and who decided that definition?**

1. Have you ever questioned whether property laws are neutral?
2. How many of your ancestors were denied land by “legal” systems?
3. How is legacy theft disguised as law today?

Key Takeaway:

White supremacy was not just enforced with violence — it was legalized on paper, in courts, and in constitutions.

The Doctrine of Discovery evolved into legal codes that ensured entire peoples could be erased with the stroke of a judge’s pen.

CHAPTER 4

Legacy Lost Across Lands

*"White Supremacy is a Global System."
-Neely Fuller Jr.*

The Doctrine Goes Global

"They came with the Bible in one hand and the law in the other. And took everything in between."

The Doctrine of Discovery wasn't just a U.S. problem.

It became a **worldwide system of legalized extraction, erasure, and economic domination.**

Different regions experienced different strategies — but the goal was the same:

Take the land. Exploit the people.

Rewrite the story.

Here's a quick global tour of how the Doctrine carved up the planet.

Turtle Island (North America)

Indigenous nations across Turtle Island (North America) had complex systems of governance, trade, and land stewardship. The colonizers called it “empty.”

How the Doctrine worked:

- Declared Native land “discovered” and claimed for the Crown
- Broke treaties repeatedly with no legal consequences
- Reclassified those that didn’t assimilate to Negro, Colored, Mulatto, and Black
- Forced removals (Trail of Tears, Canadian residential schools)
- Created “reservations” — limited, controlled zones of survival

How this still affects you today:

- Native nations still fight for land and water rights
- Indigenous children remain overrepresented in foster care
- Casinos and poverty are symptoms, not solutions

The Caribbean: Sugar, Chains & Survival

The Caribbean wasn't just paradise — it was **Europe's cash cow**. Colonizers turned entire islands into sugar factories powered by enslaved Africans.

How the Doctrine worked:

- Spain and later Britain/France claimed islands under the Pope's blessing
- Wiped out Indigenous Arawak and Taino peoples through slavery, disease, and genocide
- Created laws making Black people permanent property
- Built racial hierarchies that shaped colorism and class

How this still affects you today:

- Many Caribbean nations still owe colonial-era debts
- Global sugar and rum industries trace back to slavery
- Caribbean immigration policies reflect colonial hierarchies

Africa: Borders & Broken Economies

Africa wasn't "discovered." It was partitioned like a business deal. At the 1884–85 Berlin Conference, European powers divided the continent without a single African at the table.

How the Doctrine worked:

- Europeans claimed rights over entire regions
- Drew borders that ignored tribes, languages, and cultures
- Extracted gold, rubber, diamonds, and human labor
- Installed puppet governments and missionaries

How this still affects you today:

- Many African countries still depend on former colonizers for aid and currency
- Civil wars and ethnic conflicts are often fueled by colonial boundaries
- The global resource market still extracts more than it returns

Australia & New Zealand: Terra Nullius & Treaty Lies

In Australia, colonizers declared the land “terra nullius” — nobody’s land — despite millennia of Aboriginal stewardship.

In New Zealand, the British signed a treaty with the Māori — then ignored it.

How the Doctrine worked:

- Aboriginal people were not counted as citizens until 1967
- Land was taken without treaties, compensation, or consent
- Children were stolen (Stolen Generations) to “civilize” them
- Māori land was confiscated and resistance met with violence

How this still affects you today:

- Aboriginal Australians face systemic poverty, violence, and incarceration
- Māori continue land claims and treaty protests
- Modern land acknowledgments still lack reparations

REFLECTION BOX

“They did not discover land — they discovered a way to justify stealing it.” — Constructive House

 **Have you ever asked yourself: “Who lived here before me?”**

1. Do you know the Indigenous name of your city or state?
2. What industries in your region rely on stolen land, labor, or ideas?
3. How are present-day wealth gaps rooted in these land grabs?

Key Takeaway:

The Doctrine of Discovery created a global caste system — and wrapped it in law, religion, and capitalism.

Legacy theft didn’t just happen in the past. It still shapes housing, policing, banking, and borders around the world.

CHAPTER 5

The Refiners — Who Really Benefits?

“If you do not understand white supremacy—what it is, and how it works—everything else that you understand will only confuse you.”

— Neely Fuller Jr.

By the time the Doctrine of Discovery had reshaped the globe, what began as religious conquest evolved into something more elusive, more “refined.”

**The theft was no longer always brutal or obvious.
It became policy, inheritance, and profit.**

The colonizers refined their methods — but the outcome remained the same: mass land theft, generational exclusion, and confusion among the masses about who the true beneficiaries are.

This is where we must ask: Who really benefits?

White Supremacy ≠ White People

Let's get something straight: **white supremacy is not just about skin.**

It is a system of control, an economic and social structure designed to protect the **dominant class** — historically white and European — but more accurately described as the **powerful class**.

- It elevates skin color only as a tool.
- It uses race to divide and distract.
- It protects the wealth accumulated from stolen legacies.

In this refinement phase, the system no longer needs visible whips or papal bulls.

It operates through zoning laws, school district funding, property tax assessments, and gentrification — **policy wrapped in politeness.**

The Co-Opting of Poor Whites

One of the most insidious moves of the refinement phase was convincing poor and working-class white people that their alignment was with the elite — not with the oppressed.

They were given just enough access:

- Legal rights denied to others
- Jobs on top of Black labor
- The illusion of “superiority” in exchange for loyalty

They forfeited their lands.

They suppressed their wages.

They broke their unions.

All to align with the **powerful class** (white supremacy) as a tool to support the theft, dominance, and mistreatment of non-whites (blacks).

This is why white supremacy continues. Because it disguises theft with race — and uses it as bait.

Who Are the Refiners Today?

They no longer wear powdered wigs. But their hands are still in the soil — and in your rent.

Today's refiners include:

- Real estate moguls flipping stolen land at luxury prices
- Tech billionaires buying up agricultural land and water rights
- Pharmaceutical empires built on knowledge stolen from Indigenous healers
- Credit systems designed to punish the colonized and enrich the investor class

They often speak the language of equity — but act through exploitation.

They use words like “redevelopment,” “opportunity zones,” and “innovation” — while pushing Black (Non-White) people out.

REFLECTION BOX

“They did not discover land — they discovered a way to justify stealing it.”

— Constructive House

 **“What does it mean to benefit from a system built on theft, if you’re still struggling?”**

1. Have you seen examples of people defending a system that hurts them?
2. Why might they do that?
3. Have you ever asked yourself: “Who lived here before me?”

Call-Out: “The Refinement Phase Checklist”

“If you do not understand white supremacy—what it is, and how it works—everything else that you understand will only confuse you.” — Neely Fuller Jr.

Use this quick list to spot when you’re in the presence of refined white supremacy:

- ✓ Theft is hidden in paperwork (titles, liens, zoning)
- ✓ Violence is outsourced (police, banks, courts)
- ✓ Language is sanitized (“urban renewal” = removal)
- ✓ Elites appear “diverse” but uphold the same system
- ✓ “Equity” is discussed, but wealth remains untouched

Let this chapter be a moment of clarity.

Not all white people are white supremacists.

And not all Black and Indigenous people are free.

The question is: what role are you playing — and who are you protecting?

CHAPTER 6

The Resistance Blueprint — How We Fight Back

*"We are not fighting for integration nor separation.
We are fighting for balance between all people...
and repair-ations for stolen time, land, labor, and
life."*

— *Constructive House*

After five centuries of deception, theft, and policy refinement, it's no longer enough to know the truth — we must organize, strategize, and reclaim what's ours.

This isn't about handouts.

This isn't about revenge.

This is about justice — **measured in land, equity, access, and power.**

It starts with recognizing the system, but it ends with dismantling and rebuilding it.

The Tools of Resistance

1. Land Literacy

Understand property records. Know how land was taken. Study heirs' property laws, tax deeds, zoning codes, redlining maps, and eviction histories.

What they hide in paperwork, we reveal with research.

2. Community Capital

Pool resources. Crowdfund down payments. Create land trusts. Develop buyer co-ops.

One person may not afford a block. But ten families can.

3. Legal Warfare

Use FOIA. File CFPB complaints. Challenge appraisals. Know the Fair Housing Act.

They've used the law to exclude. We can use it to expose.

4. Memory As Weaponry

Tell your family stories. Trace your ancestors. Document your community's history.

They bet you'd forget. But we remember everything.

5. Digital Organizing

Use tech to map injustice. Build data archives. Expose lenders, developers, and institutions.

Data is power when wielded with purpose.

The Constructive House Method

We don't just resist — **we build**.
We teach, we track, **we tool up**:

Tactic	Purpose	Real-World Outcome
 Calculators & Templates	Demystify mortgages, appraisals, budgets	Users avoid predatory lending
 Documentation Systems	Log discrimination and denial patterns	Evidence for lawsuits and investigations
 Tech Integration	Make tools accessible on all devices	Empowerment without gatekeepers
 Storytelling & Archives	Center suppressed histories	Cultural healing and legal awareness

This is more than activism.

It's **technical justice**.

It's **informed insurgency**.

Call-Out: “This Is Still Happening”

- ✓ **2023:** Black homebuyers in Atlanta denied loans at 2x the white rate
- ✓ **2024:** AI appraisal tools found to replicate racial bias
- ✓ **Ongoing:** Developers using LLCs to silently buy up Black land in hurricane-affected zones

This isn’t past tense. It’s present danger.

But also present power — if we move with precision.

Call-to-Action: From Victims to Strategists

We’re not waiting for saviors.

We’re sharpening our own tools.

-  **Learn the lending system**
-  **Connect with real estate justice networks**
-  **Build local alliances: lawyers, housing counselors, appraisers**
-  **Invest in education that’s tied to land, law, and legacy**

“To fight the system, you must first unlearn its lies — then outmaneuver its rules.”

CHAPTER 7

What Justice Really Looks Like

*"Justice is not a metaphor. It's measurable.
Tangible. Transferable."
— Constructive House*

You've been told justice is about apologies.

That progress means laws on paper.

That "we're moving in the right direction."

But the right direction isn't forward — **it's back.**

Back to the stolen deeds, the broken treaties, the seized futures.

This chapter doesn't imagine justice — it *calculates* it.

Justice – Balance Between People

Justice is:

- Land back — not in symbolism, but in title and deed
- Financial redress — not just for survivors, but for their descendants

Policy reversal — not just reforming laws, but nullifying the ones built on theft

Justice is defined as “Balance between all people, guaranteeing that those that need the most help get the most constructive help”. Keep that in mind whenever you think, hear, or read the word “Justice”.

Injustice	Real Justice Would Mean...
246 years of unpaid labor	Reparations tied to GDP, with land options
Redlined zip codes	Guaranteed low-interest loans & grants
Appraisal bias	Mandatory equity audits & restitution funds
Land loss via tax sales	Automatic right of redemption & restitution

Justice must match the depth of the harm — or it isn't justice at all.

Global Demands, Local Remedies

United States

Land Return: Black and Indigenous land trusts

Reparations: Municipal, state, and federal (HR40 is the floor, not the ceiling)

Caribbean

Debt Cancellation: IMF loans were the second theft

Reparations: EU and UK forced to pay for stolen labor

Africa

Land & Resource Sovereignty: Stop extraction without reparative investment

Return of Stolen Artifacts: Tangible cultural restoration

Australia / **New Zealand**

Abolish Terra Nullius logic: Recognize enduring sovereignty

Fund Indigenous-led housing and education autonomously

Sidebar: “Don’t Let Them Rebrand It”

They’ll call it:

- “Economic Empowerment”
- “Opportunity Zones”
- “Race-neutral Equity”

But if it doesn’t include:

- Land transfer
- Cash restitution
- Power-sharing

...it’s not justice. It’s Public Relations.

What Repair Actually Looks Like

Housing

Direct land transfers to land trusts & co-ops

Wealth

Reparations paid in cash, land, or equity shares

Education

Debt cancellation + funding for justice-focused schools

Healthcare

Free community-based clinics in historically neglected zones

Narrative

Public memorials, corrected textbooks, cultural investment

Our Justice Vision

- Co-ops instead of slumlords
- Trusts instead of extractors
- Schools that teach truth, not myths
- Technology used to restore, not surveil

We don't want inclusion into the system that looted us.

We want a **new structure**.

"A justice model where land, money, and memory are returned — not managed."

Final Words: The Work Ahead

Justice won't come from Congress.

It won't come from courts alone.

It comes when we demand it and build it — one community, one land parcel, one loan denial challenged at a time.

You now have the blueprint.

The redlining ends here.

Epilogue: What They Stole, We Rebuild

This isn't just history.

It's ongoing warfare by quieter *means*.

They used red lines. We draw **power lines**.

They used courts. We use **community corridors**.

They built empires. We build **ecosystems**.

The doctrine that fueled colonialism isn't gone — it just wears new suits:

- Predatory lending
- Gentrification
- Environmental racism
- Tech surveillance

But you hold the receipts now.

You hold the language, the lineage, and the **legal logic** to fight back.

Legacy theft ends when we replace their systems with ours.

"You were never meant to own nothing.

They were never meant to own everything."

Reclamation is not a metaphor. It's a **mission**.

 Reflect & Reclaim:

*"If you do not understand white supremacy—what it is, and how it works—everything else that you understand will only confuse you." — **Neely Fuller Jr.***

1. What did I learn from this book?
2. How has this shaped how I see the world?
3. What action can I take to reclaim what was lost?

 Notes:

*"If you do not understand white supremacy—what it is, and how it works—everything else that you understand will only confuse you." — **Neely Fuller Jr.***
